

DocPath® Business Suite Pro™

Intelligent document design, generation and distribution for the medium enterprise

Highlights

- Document design tool with a professional feel.
- Potent static and dynamic document generator.
- Document distribution to printers or via fax and email servers.
- Easily integrated into existing business applications.
- Based on a new, revolutionary document technology: DocPath Ipanema Technology.
- Makes document management technology affordable to the medium enterprise.

Professional document generation and distribution through multiple channels

In a medium enterprise, there are two objectives which are a must to survival: improving business processes and enhancing customer service. DocPath has held fast to these goals when designing solutions aimed at the middle market. Business Suite Pro is DocPath's solution for this market segment. This solution offers professionally designed documents, such as invoices or waybills, to be dynamically generated and distributed to multiple printers and faxes or to be sent by email.

There was a time when middle market companies had to discard the use of document software solutions found in large enterprises due to their lack of configuration flexibility and their high cost of ownership. With Business Suite Pro, DocPath has been able to level the playing field with a simple, easy to use, yet affordable solution.

Advantages of DocPath Business Suite Pro

- Intuitive design tool and potent generator of static and dynamic documents.
- Integrates with existing ERPs: SAP, Oracle, JD Edwards, Microsoft Dynamics NAV, Epicor, etc.
- Multiple output formats: GDI, PCL, PDF, PostScript, etc.
- Integrates with other document management systems: Documentum, FileNet, Content Manager, etc.
- Includes a fax and email distribution system.
- Easily upgradable to DocPath Enterprise.
- Easily distributed through DocPath's Business Partners: install, design and distribute.
- Available for different platforms: Windows, Linux, System i, Unix (Solaris, HP-UX, AIX), etc.

DocPath Business Suite Pro

Intelligent document design, generation and distribution for the medium enterprise

Installs quickly - intuitive to use

Specifically designed for the medium enterprise, Business Suite Pro installs quickly and easily while integrating with the organization's existing business applications.

With DocPath Ipanema Technology, the new core technology of DocPath solutions, document design and generation is now available to all types of users. In consequence, Business Suite Pro offers complete and straightforward design capability with the possibility of creating static and dynamic documents. Similarly, other design elements, such as 2D barcodes and 2D or 3D dynamic charts, can be easily incorporated into documents. To this end, Business Suite Pro provides a professional graphic design environment with all the necessary tools to easily and quickly create business forms.

Additionally, this solution includes a generation engine that merges the designed forms with business data to produce the desired document.

Multiple output options and multiple distribution channels

Business Suite Pro provides features that go beyond form and document design with different output options and multiple distribution channels. This advanced solution not only provides different types of print output formats, such as GDI, PCL, Postscript and PDF, but also includes the DocPath® Mail & Fax Service™ module, which offers the choice of distributing the finished document via fax or email.

With all these features, medium enterprises can offer clients value added, high quality services while improving their corporate image.
